

Name: Krystina Baudrey
Major: International Relations
Graduation Year: 2019
Lab Term: Summer 2018 - Spring 2019

I joined Doctor Joseph's lab in June of 2018 and left right after graduation in June of 2019. I worked as a "Media Intern" for the New York Times Media Project. The lab challenged me to view media with a new perspective. This lab taught me to review and analyze information which will help me in future endeavors. I majored in International Relations with an emphasis in the Middle East and I minored in Arabic, therefore, the research we did in this lab fit very well in my studies. I was able to apply prior knowledge to topics that we researched. I recommend applying to the lab because it is a great experience that can carry on to a professional career.
